Cyber Risk Assessment & Management

1 WHAT THE SERVICE IS

A structured approach to identifying, analysing, and mitigating cyber risks across on-premises and cloud environments. This service ensures compliance with regulatory frameworks, prioritises vulnerabilities, and delivers actionable strategies to enhance resilience, reduce exposure, and align security posture with organisational objectives and industry best practices.

FEATURES

- Comprehensive risk identification across hybrid IT and cloud environments
- Quantitative risk scoring using FAIR or CVSS methodologies
- Compliance mapping to ISO/IEC 27005, NIST RMF, GDPR standards
- Third-party and supply chain risk evaluation for vendor security posture
- Cloud and on-premises risk analysis with shared responsibility models
- Business impact analysis linking cyber risks to operational outcomes
- Prioritised risk treatment planning with actionable mitigation strategies
- Continuous monitoring framework for ongoing risk tracking and reporting
- Executive dashboards delivering clear, actionable insights for leadership
- Integration with GRC tools for enterprise governance and compliance.

BENEFITS

- Enhanced visibility into cyber threats and vulnerabilities
- Assured compliance with regulatory and industry security standards
- Improved operational resilience against evolving cyber risks
- Reduced financial impact from breaches and penalties.
- Informed decision-making for strategic security investments
- Increased stakeholder confidence through proactive risk management
- Continuous improvement of enterprise security posture
- Strengthened supply chain and vendor security assurance
- Transparent governance with clear, data-driven reporting
- Alignment of cyber risk strategy with business objectives.

OVERVIEW

The Cyber Risk Assessment & Management Service offers a structured approach for identifying, analysing, and addressing cyber risks throughout enterprise systems and operations. This service supports compliance with regulatory requirements, industry benchmarks, and an organisation's specific risk tolerance, helping teams actively manage threats and vulnerabilities to protect vital assets.

Through well-established frameworks like ISO/IEC 27005 and the NIST Risk Management Framework, the service helps evaluate and measure potential cyber risks that could impact business activities. Strong

governance practices are integrated so organisations can assess risk priorities, create focused mitigation strategies, and make informed investments in security that strengthen resilience and encourage ongoing development. This service enables stakeholders to align their cyber risk plans with broader business goals, promoting clear governance and enduring protection from emerging threats.

Purpose

- Assess and quantify cyber risks impacting business operations
- Align risk management strategies with ISO/IEC 27005, NIST RMF, and organisational governance
- Enable informed decision-making through risk prioritisation and treatment plans
- Support continuous improvement and resilience against evolving cyber threats.

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.
