

Rapid Security Assessment

Fast-track your cyber resilience.

Overview

The Rapid Security Assessment offers a fast and focused review of your security posture, addressing immediate vulnerabilities and providing clear remediation guidance. It is ideal for organisations that need an actionable assessment to validate security controls, support cloud migration or respond to evolving threats.

Why it matters

Uncovers hidden risks through a structured evaluation of your IT environment.

Identifies unmanaged devices, software deployment gaps, and usage patterns that could expose vulnerabilities.

Provides clear remediation steps and establishes processes to strengthen cyber resilience and reduce future risk.

Reviews policies and controls to ensure they effectively reduce risk and align with best practices.

What you'll get

- ✓ Quick turnaround (1–2 weeks) with minimal customer time required
- ✓ Immediate insights into vulnerabilities and compliance gaps
- ✓ Actionable plan for improving security and reducing risk

Our approach

A structured, four-phase process delivered by experts:

01

Planning

Define business goals and objectives

02

Data Collection

Assess your current data estate

03

Analysis

Identify gaps and optimise investments

04

Action

Implement a tailored security mitigation plan

Why choose this assessment?

- ✓ Navigate confidently with expert guidance
- ✓ Gain visibility into vulnerabilities and compliance gaps
- ✓ Build a roadmap for robust data protection and governance

Time commitment

Assesments take from 1-2 weeks requiring at least 3-8 hours of customer commitment.
