

Cloud Migration Navigator

Purpose

A structured, consultative assessment that clarifies your cloud readiness, builds a business case, and delivers a clear, evidence-driven migration plan - empowering confident, strategic cloud adoption.

What?

Work with ANS through our Navigator based approach to generate all of the information and evidence you need to underpin your cloud migration project inclusive of a business case and full Total Cost of Ownership (TCO).

How?

A tailored roadmap of engagement and workshops based on your current estate and readiness to carry out a cloud migration across all key areas.

Cost

Free of Charge engagement

Benefits

- Identify the tangible business and **organisational benefits** that a cloud migration can deliver.
- Evaluate the **financial and operational impact** of maintaining the current state ("the cost of doing nothing").
- Clarify your **technical direction** and determine which cloud approaches best align with your organisation's needs and future strategy.
- Unlock access to available **vendor funding** to support and accelerate your migration journey.
- Build a structured **migration plan** that aligns with key business milestones, critical dates, and delivery timelines.

Output

- Technical Discovery.
- Understanding the technical options and providing guidance.
- Target architecture and operating model.
- High-level transition plan.
- Detailed business case & Total Cost of Ownership (TCO).
