1. What are Low-Code Services?

Low-Code practice provides a comprehensive suite of services to empower your organisation to leverage the advantages of low-code development platforms. We partner with you throughout the entire lifecycle of your BPM/low-code projects, ensuring successful implementation, ongoing functionality, and maximising your return on investment.

Our Services Encompass:

Consulting:

- Our Business Architects engage with customers to identify opportunities, pain points, and define requirements for BPM / low-code development within your domain
- Recommending the most suitable BPM / low-code platform based on your specific needs and goals
- Developing a BPM / low-code implementation strategy aligned with your IT infrastructure and governance
- Designing the BPM solutions and low-code applications, including, but not limited to, the selection of the low-code development platform, designing/defining data models, user interfaces and orchestration of workflows.

Delivery:

- Rapid application development using low-code tools, ensuring efficient project execution
- Integration with existing systems and data sources, creating a seamless user experience
- Building secure and scalable applications that meet your business requirements.

Support:

- Ongoing maintenance and technical support for your low-code applications
- User training and adoption programs to empower your team to leverage the platform effectively
- Governance and change management to ensure the long-term health and security of your applications
- Continuous improvement recommendations and implementations, measuring performance, identifying any bottlenecks and delivering enhancements.

Benefits of Choosing Our BPM Low-Code Expertise:

- **Faster Time to Market:** Deliver applications more quickly with low-code development compared to traditional coding methods
- **Reduced Development Costs:** Low-code platforms minimise the need for extensive coding, leading to cost savings
- **Empowered Business Users:** Citizen developers within your organisation can contribute to application development
- **Improved Agility and Scalability:** Easily adapt your applications to evolving business needs with low-code tools.

By partnering with our BPM / Low-Code practice, you gain a trusted advisor to navigate your low-code journey, unlocking the full potential of these platforms to streamline your business processes and achieve your digital transformation goals.

2. What does it deliver?

We become your trusted partner throughout the entire BPM / low-code development lifecycle, helping you:

Accelerate development times: BPM / Low-code development significantly reduces coding requirements, enabling faster application delivery.

Empower citizen developers: Business users with limited coding experience can contribute to application development through the intuitive nature of BPM / low-code platforms.

Improve agility and scalability: BPM / Low-code applications are easily adaptable to changing business needs and can scale up or down as required.

Reduce development costs: Using pre-built components and streamlined development processes results in significant savings.

Enhance user experience: BPM / Low-code platforms enable the creation of user-friendly applications that improve user adoption and satisfaction.

By partnering with us, you gain access to a team of BPM / low-code specialists who can guide you every step of the way, maximising the potential of BPM / low-code development for your organisation.

3. What technology does it use?

Low-Code Software Consulting, Delivery, and Support services leverage a combination of leading low-code development platforms (LCDPs) and complementary technologies to deliver the optimal solution for your specific needs.

Some of the popular LCDPs we have experience with are:

- Pegasystems
- Appian
- Mendix
- OutSystems
- Open Text
- Comidor.

Complementary technologies we use for a comprehensive solution, such as:

- Business Process Modelling Notation (BPMN) tools for process mapping
- Cloud platforms like AWS, Azure, or GCP for deployment
- Integration tools for connecting with existing systems.

In a nutshell, we can assess specific needs and recommend the most suitable technology stack.

4. What terms apply?

To the fullest extent permitted under G-Cloud 15 Framework Agreement and the Call-Off Contract, Atos will provide the Services in accordance with the Atos Supplier Terms (which will include, but may not be limited to , the Supplier Acceptable Use Policy, Supplier Data Processing Agreement, Supplier Specific Shared Responsibility Model, Supplier SLAs and Supplier Licence Terms and any applicable Third-Party Terms outlined in this Service Description document and the Order Form) and this Service Description document.

For clarity:

- Atos Supplier Terms may be modified in accordance with the provisions of the Call-Off Contract, and remain effective except where expressly overridden.
- Hyperlinks included in the Atos Supplier Terms and Service Description document remain effective where they point to Atos' or the relevant Third-Party Terms or documents. Should a hyperlink cease to function, Atos will work with the client to update it through the agreed procedure.

5. Termination

Termination shall be in accordance with:

- The G-Cloud 15 Framework terms and conditions
- Any terms agreed within the Order Form of the relevant Call-Off Contract
- For this specific service, by default Atos ask for at least thirty (30) days prior written notice of termination without cause.

Atos commits to the continued provision of services for the duration of the Call-Off Contract subject to the terms and conditions of the G-Cloud 15 Framework Agreement, the Call-Off Contract, the Atos Supplier Terms and the applicable Third Party Agreements (as defined in the Atos Supplier Terms and indicated in the Order Form) related thereto.

6. How do I order?

Please contact our team at: gcloud@atos.net

- We will prepare a quotation for your review, including any applicable volume discounts.
- Once the quotation is agreed, we will issue the necessary documentation (as required by the G-Cloud Framework) and request a purchase order from you.
- Upon receipt of your purchase order, we will configure the services in line with the agreed requirements. Where applicable, you will also receive access to our self-service portal to begin provisioning services.
- If you are a new customer, you may need to complete additional 'new supplier' forms.
- Invoices will be issued to you and to Crown Commercial Service (CCS), quoting the purchase order number, for the services procured.
- We will also submit the required monthly management information reports to Government Procurement.

7. Glossary

Term	Definition
BPM	Business Process Management
GCP	Google Cloud Platform
BPMN	Business Process Modelling Notation
LCNP	Low Code Platforms

8. Why Atos

Atos has been a trusted partner on every G-Cloud iteration since the framework began, helping public sector organisations modernise with confidence. We combine global expertise with deep UK experience, delivering secure, scalable cloud solutions that meet the highest government standards.

As Europe's leading provider of cloud and cybersecurity services, Atos offers end-to-end capabilities - from migration and hosting to SaaS and consultancy - supported by UK delivery centres and strategic partnerships with hyperscalers.

Our focus on innovation, sustainability, and social value ensures that customers not only achieve operational excellence but also contribute to a greener, fairer future. With Atos, you gain a proven partner committed to driving efficiency, resilience, and transformation across public service.

About Atos

Atos Group is a global leader in digital transformation with c. 67,000 employees and annual revenue of c. €10 billion, operating in 61 countries under two brands – Atos for services and Eviden for products. European number one in cybersecurity, cloud and high-performance computing, Atos Group is committed to a secure and decarbonized future and provides tailored AI-powered, end-to-end solutions for all industries. Atos Group is the brand under which Atos SE (Societas Europaea) operates. Atos SE is listed on Euronext Paris.

The purpose of Atos Group is to help design the future of the information space. Its expertise and services support the development of knowledge, education and research in a multicultural approach and contribute to the development of scientific and technological excellence. Across the world, the Group enables its customers and employees, and members of societies at large to live, work and develop sustainably, in a safe and secure information space.
