Price

£1,100 + VAT per unit per month. A unit consists of 2 CPU cores and 2GB RAM.

The number of units you require will depend on the size of your organisation. One unit is typically suitable for organisations up to 500 staff; however, this is a guide only as load on the unit will be dependent on how many content creators/editors exist in your organisation, and how many of these content creators use the system concurrently. Additional units can be added seamlessly as and when needed.

Bespoke Configuration and support

We can also accommodate custom configuration where resource allocation not covered by our standard server profiles is required. Please refer to our rate card using the link below.
