

Quantum 365

Revolutionise your Microsoft Office 365 Management with Quantum M365

Experience unparalleled visibility across your Microsoft 365 estate. Our innovative Quantum tool empowers you to cut costs, enhance security, and efficiently organise user data. Quantum M365 is an essential tool for your business.

Features

- ✓ **User-Friendly Interface:** Simple and intuitive design.
- ✓ **Role-Based Persona Menus:** Tailored to FinOps model for key stakeholders.
- ✓ **User Trends:** Track and analyse user behaviour.
- ✓ **Copilot Usage Analysis:** Identify ideal Copilot candidates.
- ✓ **Savings & Value:** Address license wastage across disabled, aged, and unused licenses.
- ✓ **License Optimisation:** Identify underutilised licenses with re-tiering recommendations.
- ✓ **Licensing Cost Forecast:** Predict future licensing costs.
- ✓ **Savings Tracker:** Automatically track optimisation savings realised.
- ✓ **Smart Tagging:** Group resources for cross-charging and budgeting.

Benefit

- ✓ **FinOps-Aligned Menus:** Inform > Optimise > Operate.
- ✓ **Autonomous Work:** Empower personas to find their own answers, eliminating guesswork.
- ✓ **Simplified Licensing:** Navigate licensing complexities with ease.
- ✓ **Maximised Investment:** Use insights on user adoption to get the most out of your investment.
- ✓ **Enhanced Financial Planning:** Use forecast reports to understand cost drivers.

Value

- ✓ **FinOps Alignment:** See, understand, and accurately plan licensing costs by aligning IT billing to business categories and resources.
- ✓ **Reduce Contract Spend:** Ensure you're only paying for what you use and identify underutilised licenses.
- ✓ **Manage Leavers:** Reduce cost and risk by identifying leaver accounts, removing unnecessary access, restricting high-risk leavers, and re-harvesting inactive licenses.
- ✓ **Improve Procurement Strategies:** Gain insights into application usage by different user types to profile users and align your Microsoft contract, enhancing budgeting and spend forecasting.
- ✓ **Mitigate Security and Compliance Risks:** Gain visibility into Microsoft security features like Secure Score, ensuring effective use and monitoring file-sharing statistics via OneDrive, SharePoint, and Teams.
- ✓ **Enhance Business Productivity:** Visibility into application usage at the department or organisational unit level supports adoption initiatives and productivity improvements.
- ✓ **Drive Adoption:** Monitor licensed application and feature adoption across the M365 suite.

FinOps Services

Is your business struggling to allocate the time and resources needed to effectively manage your M365 spend?

Our team of FinOps experts can help with our FinOps Managed Services. Using Quantum M365, we generate insightful reports combined with our consultants' industry expertise to provide recommendations aligned with your business strategy, making it easier to manage your M365 spend.
