Cyber Enhanced Security Professional Services - Service Definition

Vodafone Business Security Enhanced (VBSE)

VBSE is dedicated to protecting your critical service and your data. Based in dedicated secure locations and staffed by security cleared personnel from the account management team through to design, installation and operations you can be sure your organisation is protected.

VBSE has state of the art systems and locations, the security of which is approved by our existing customers; all are subject to significant rolling investment to maintain security.

PROFESSIONAL SERVICES

VBSE works with customers and partners to provide tailored solutions and consultancies to realise their security strategies. VBSE helps customers grow their security maturity by focusing on the identify, detect, protect, respond and recover functions.

KEY FEATURES

- Fully scalable, onshore and security cleared resource to meet customer requirements
- Project governance support with suitably qualified managers
- Expertise across the cyber security portfolio range
- Experience and knowledge in a vast amount of customer platforms
- Ability to bespoke service according to customer requirements

KEY BENEFITS

- Help understand security maturity level
- Help formulate security strategy
- Insight into security posture
- Incident support
- Compliance and governance support

SERVICES

- Cyber Security Review- A review of your cyber security capabilities to understand cyber risks and how to overcome them.
- Full Spectrum Testing - Technical security assessments and penetration testing services to identify areas of cyber vulnerability within your organisation.
- Retained Incident Response - Ongoing incident response testing and support to help you reduce the likelihood and impact of security breaches.
