Integrated Managed Infrastructure (IMI Official) for AWS & Azure

The Managed Services listed within this guide are typically invoiced as a Monthly Recurring Charge with some services available as a One-Off Charge.

All prices exclude Travel expenses where applicable.

Our service is a fully integrated managed service that allows organisations to make best use of their enterprise cloud IT infrastructure, without the need to bring in new people and adopt new support processes. Prices are charged on a Monthly Recurring basis and charged typically by the cumulative number of service units i.e. compute 'x' number of instances. This charge can vary monthly based on the service units consumed within a particular month.

Managed Components	Pricing Unit	List Price UK monthly recurring
Compute - (including attached storage and native backup) AWS (EC2+EBS+Snapshot Backups) Azure (VM + Managed Disks + Azure Backup)	Per Instance	£217.00
Virtual Network - (including DNS Service, direct link, VPN gateways) AWS (VPC including Route53, Direct Connect, VPN Gateway) Azure (VNET including AzureDNS, Express Route, VPN Gateway)	Per Instance	£240.00
PaaS - Database as a Service - RDBMS AWS (RDS – supported engines) / Azure (Azure SQL, AzureDB for MySQL, AzureDB for PostGres) PaaS – NoSQL Database: AWS (DynamoDB) or Azure (Cosmos DB) PaaS – Datawarehouse: AWS (Redshift) / Azure (SQL Datawarehouse) PaaS – Caching Service: AWS (ElastiCache) / Azure (Redis Cache) PaaS – Hadoop Service: AWS (EMR) / Azure (HDInsights) PaaS – Native Load Balancers: AWS (ELB, ALB) / Azure (ALB, Traffic Manager, Application Gateway) PaaS – Storage Service: AWS (Storage Gateway) / Azure (StoreSimple) PaaS – Serverless: AWS (Lambda) / Azure (Functions) PaaS – Key Management Services: AWS (KMS) / Azure (KeyVault) PaaS – Application Services: AWS (ElasticBeanstalk) / Azure (WebApps) PaaS – Batch Services: AWS (Batch) / Azure (Batch)	Per Instance	£189.00
Storage - including Native Object Storage Service and Archival Storage AWS (S3 + Glacier) and Azure (Storage Accounts)	Per TB	£9.00
Database Engines - MSSQL, MySQL, Postgres	Per Database	£82.00
Database Engines - Oracle, DB2	Per Database	£197.00
Middleware - Websphere Application Server	Per Instance	£334.00
Middleware - Websphere MQ	Per Instance	£334.00
Middleware - Microsoft IIS	Per Instance	£334.00
Middleware - IBM Integration Bus	Per Instance	£691.00
Middleware - Redhat JBOSS	Per Instance	£194.00
Middleware - Oracle Weblogic Application Server	Per Instance	£194.00
Middleware - Apache HTTP Webserver	Per Instance	£194.00
Middleware - Apache Tomcat	Per Instance	£194.00

There is also a charge to onboard a customer at the start of the service (Customer Managed Services Implementation), this is a One-Off Charge and charged per customer.

Managed Component	Pricing Unit Measure	List Price UK One Off
Customer Managed Services Implementation (Phase One)	Per Customer	£10,815
