Application Discovery & Assessment

Application Discovery & Assessment

Evaluates the scope and approach for migrating a portfolio of applications to cloud computing, by assessing a sample of, including target state and migration approach.

All prices **Exclude** Travel expenses where applicable.

This service is an Assessment to determine architectural and operational readiness for migration to the cloud and will review and assesses from 10 to 50 applications manually and 10 to 100+ using automated data collection & analytics. The service defines the target state of the applications and the recommended migration path in a report presented back to the customer.

This price is per engagement and the below table is a simplified List Price.

The services listed are those that are delivered as a 'one time service' individually or as part of an overall solution.
