QA TEST ENGINEERING SERVICE

CACI delivers fully managed, cost-effective QA services through highly experienced teams designed to meet modern cloud demands. We also offer tailored testing consultancy, providing flexible support that aligns precisely with your services and delivery goals.

As strong advocates of agile methodologies, CACI brings deep test engineering expertise in the design and implementation of open-source automation tools and robust test frameworks. We help organisations accelerate delivery and maximise business value through test-driven and behaviour-driven development, while also embracing emerging technologies such as serverless architectures to intelligently scale testing capabilities. Our approach is inherently collaborative, ensuring quality is embedded throughout the delivery lifecycle.

CACI provides a comprehensive suite of testing consultancy services to support the integration and adoption of cloud-based solutions. We specialise in automating both functional and non-functional testing within CI pipelines, enabling faster, more reliable releases. Our expertise extends to cloud compliance testing and framework design, underpinned by a shift-left, automation-first philosophy. In addition, we deliver proven transition and data-migration testing strategies, ensuring a seamless move from legacy systems to modern, disaggregated cloud environments.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL_V3 aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the Lot 3 - Cloud Support Rate Card .

Full details and pricing can be found within CACI's Lot 3 - Cloud Support Rat Card which shows the range and cost of expertise.
