At CACI, we help you Identify and deliver value from advanced technologies with confidence, realising business benefit. Our service offers both advice and delivery expertise in AI engineering, model-first engineering, artificial intelligence (AI/ML), Internet of Things (IoT), Blockchain, Digital Twin, and big data analytics in highly regulated environments.Features of the service include:

- Tailored discovery sessions to identify opportunities for advanced technology usage
- Readiness assessments to gauge organisation maturity and inform strategy
- Agile delivery with Alpha/Beta/Delivery of MVP in target areas
- Innovation workshops aligned to CACI innovation team for idea generation
- Understand to improve productivity with AI engineering and other approaches
- Determine how IoT can improve organisational responsiveness
- Build Digital Twins that benefit your organisational what-if analysis
- Provide alignment with governance and assurance requirements
- Design/build big data platforms/tools to help IT extract valuable insights
- CACI are cloud and technology agnostic, providing vendor independence.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 – Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 – Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 – Cloud Support Rate Card.

Full details and pricing can be found within CACI's published Lot 3 – Cloud Support Rate Card which shows the range and cost of expertise.
