CACI JAVASCRIPT DEVELOPMENT AND SUPPORT SERVICES

CACI has a proven track record of delivering user-centered, accessible, and award-winning web application solutions using the most popular Javascript frameworks such as React and Vue.js.

We integrate headless backend CMS and API with frontend Next.js or Nuxt.js components for best-in-class performance and SEO results. We create or support single page applications and robust Software as a Service (SaaS) solutions with React. We also use NativeScript with Vue.js, or ReactNative directly to deliver mobile apps.

In-line with the GDS Service Standards, we embrace the open-source movement and actively contribute back to numerous plugins and modules on popular frameworks.

Following Agile methodologies, we work with your strategic objectives in mind. Whether it's a new product build or a rescue project to upgrade legacy applications, our ISO accredited processes and team are here to deliver and support you long-term.

Key benefits of our service:

- Stabilise/refactor existing web/SaaS apps' Javascript frameworks
- Scale your web ecosystem and Javascript architecture sustainably
- Reduce technical debt and total cost of ownership
- Flexible delivery models from outcomes-based projects to dedicated in-house specialists
- Integrate with third-party systems via REST APIs
- Improve chances of passing GOV.UK service assessments first-time
- Automated tests suite and continuous deployments
- WCAG 2.2 accessibility compliance with inclusive design
- Increase the robustness, reliability and resilience of applications
- Data/security in-line with Cyber Essentials Plus and ISO 27001

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project

	deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's published Lot 3 - Cloud Support Rate Card Rate Card which shows the range and cost of expertise.
