

## PRICING DOCUMENT

### DATA INGESTION, CLEANSING AND ANALYTICS

CACI have been empowering organisations with advanced analytics and insights for informed decision-making for 18 years. We offer tailored data ingestion, cleansing, and analytics services, leveraging cloud-based ELT/ETL services for efficient processing of large datasets. Benefit from contextual analytics, automation, and accelerated project delivery for enhanced value. Features of the service include:

- Cloud-based ELT/ETL Services providing efficient data processing and integration.
- Bulk and Real-time Data-Ingestion for seamless ingestion of large datasets
- Support for Structured, Unstructured, and Semi-structured data
- Data Science and Engineering Expertise for data analysis and engineering.
- Advanced analytics and predictive modelling capabilities.
- Standardised Delivery Process providing consistent and efficient delivery workflows.
- Off-the-shelf and custom analytics solutions.
- Rapid establishment of baseline metrics and core analytics.
- Improved efficiency in project delivery processes.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

| Model                    | Detail                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Time and Materials (T&M) | T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Support Rate Card.                                                                                                                                                                                                                |
| Fixed Price (FP)         | Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Support Rate Card. |
| Managed Service (MS)     | Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Support Rate Card.                                                                                                                                                                                                    |

Full details and pricing can be found within CACI's published Lot 3 - Support Rate Card which shows the range and cost of expertise.
