CACI DESIGN SPRINTS SERVICES

At their heart, design sprints are about getting a team into one space and compressing the process of ideation, prototyping and testing into a single week.

Our mantra at CACI is to focus on outcomes – we are versatile and can tailor the timeline or location of the design sprint to work for your organisation and team's availability. We've even written a [whitepaper](#) on how to run design sprints remotely.

Design sprints give you agility and focus. They enable you to rapidly validate if a product or design idea is worthwhile pursuing, before making any expensive commitments or spending time developing it.

Key benefits of our service:

- Save time and money by validating product/design solutions early
- Tackle critical business problems and challenges
- Build working prototypes rapidly, including utilising GOV.UK's design system
- Gain buy-in and alignment of all stakeholders
- Empower innovation and design thinking in your teams
- Quickly understand what customers think
- Prove value to the wider organisation quickly and cost effectively
- Get data to build a business case for next steps
- A highly-experienced facilitation team with a proven track record
- Data/security in-line with Cyber Essentials Plus and ISO 27001

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 – Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 – Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service

	Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
