APPLICATION MIGRATION AND MODERNISATION SERVICE

CACI's Application Migration and Modernisation Service enables customers to benefit from reduced cost and risk as well as increased availability and resilience by migrating applications to the cloud in a secure and agile manner. The service has a secure-by-design focus covering:

- Rehosting - moving applications to a new cloud provider/platform
- Application Transfer - migrating applications to the cloud without specific redesign
- Application Transformation - redesigning and rebuilding applications in the cloud including the use of microservices
- Replacement - designing and building cloud-native applications and microservices to replace and enhance legacy capabilities.
- Lower operational running and support costs for migrated services/applications
- Secure-by-design provides greater resilience and reduced security and compliance risk
- Reach back into the AWS partner network for specialist expertise
- Track record delivering secure, high performance, mission-critical systems for HMG
- Easy upgrade, expansion and integration through Open Standards
- Design focused on gaining maximum benefit from Open Source software
- Early and incremental delivery of benefit through Agile approach
- Cyber Essentials Plus accredited, compliance with GDS, ISO27001/9001.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
