CACI DRUPAL CMS DEVELOPMENT, MIGRATION AND SUPPORT SERVICES

CACI is a Drupal Certified Partner and has over 125 years of combined experience migrating and building user-centred, accessible, and award-winning Drupal 10/11 CMS and DXP solutions for public sector organisations and arm-length bodies.

In-line with the GOV.UK Service Standards and Technology Code of Practice, we embrace the open-source movement and actively contribute back to core and contributed modules, including to the LocalGovDrupal distribution for local authorities.

We design and build the CMS components, features, AI-enabled publication workflows, content governance models, cloud infrastructure, and third-party integrations to deliver a robust, scalable, and secure Drupal Content Management System that can power all your multi-channel digital campaigns. When upgrading from earlier Drupal versions (i.e Drupal 9) or migrating from other CMS into Drupal, we take care of the features and content migration.

Post-launch, we provide 24/7 hosting and Drupal CMS support, including same-day security patching for complete peace of mind, in-line with ITIL best practices.

Key benefits of our service:

- Certified Drupal-expertise with proven track record
- WCAG 2.2 accessibility compliance with inclusive design
- Aligned to GDS Service Standards and Technology Code of Practice
- Reduce technical debt and total cost of ownership
- Integrate with internal systems, data feeds and and AI LLM
- Keep your Drupal 11, content and data secure and on the latest version
- Aligns with your Digital Transformation roadmap
- One point of contact for complete peace of mind
- Collaborative approach to knowledge sharing and upskilling your team
- Data/security in-line with Cyber Essentials Plus and ISO 27001

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input

	documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's published Lot 3 - Cloud Support Rate Card Rate Card which shows the range and cost of expertise.
