CLOUD GIS CONFIGURATION, HOSTING AND SUPPORT

CACI provides cloud-based GIS services using open source and proprietary solutions. Full design, development, DevOps, configuration and/or managed service. Support across a variety of domains including transport, defence, environmental, earth observations (EO), space etc. Target platforms include AWS, Azure, MODCloud and private secure cloud. Features of this service include:

Features include:

- Configuration and development of GeoServer, GeoNetwork & MapProxy
- Service Discovery & Meta Data Management (ISO 19115/19119, MGMP, CSW)
- Building, configuring and deploying geo-spatial catalogues
- Configuring and hosting tile serving solutions (e.g. OpenMapTiles, Tileserver-GL)
- Setup, design and configuration of ESRI
- Building Geospatial datasets and databases
- Extract, transform & load (ETL) of geospatial data
- Web Services: HTTP/HTTPS, FTP, OGC
WCS/WMS/WMTS/WFS/WPS/WMC/OWS
- Context, OpenAPI/Swagger
- Data Formats: XML/KML/GML/HTML, NetCDF, GRIB, HPAC, PP, JSON, CSV, Tiling
- Extending and configuring OGC CITE/TeamEngine test suites

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
----------------------	---

Full details and pricing can be found within CACI's the published Lot 3 - Cloud Support Rate Card which shows the range and cost of expertise.
