CLOUD WEB APPLICATION DEVELOPMENT SERVICES

CACI's modern user-centric application development is based on open source, open standards and cloud-native evolutionary architectures. Our end-to-end Cloud Web Application Development service is provided by an in-house team of over 200 experienced polyglot technologists that design and build new, or modernise existing, mission-critical web applications for the Cloud. We work collaboratively and iteratively as a trusted Agile partner to deliver complex, critical digital services.

We are able to provide this service as a fully outsourced team, augmenting your own teams on-site, or as a mix of on-site and delivery from our own secure facilities. User research through interviews, observational research, affinity diagramming.

- UX/UI Design & Implementation: Angular and React frameworks
- Agile project methodology/processes: Scrum, Kanban & SAFe
- Secure Continuous Integration/Delivery: DevSecOps, Automated Test (SCA, SAST/DAST/IAST, Unit/Integration/BDD, Accessibility/Compliance)
- Multi-disciplinary security cleared teams across the UK with secure facilities
- Track record delivering secure, high performance, mission-critical systems for HMG
- Expertise and extensive experience in AWS and Azure with professional certifications

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's published Lot 3 - Cloud Support Rate Card SFIA Rate Card which shows the range and cost of expertise.
