CACI UI DESIGN SERVICES

CACI's UI design expertise enhances digital experiences helping to generate revenue, boost conversions and save time on customer support.

The UI of a website or mobile app says so much about the brand it's representing. A strong UI also facilitates your users' journeys through your digital products and services, seamlessly guiding them to reach their goals with ease.

To ensure continuity in future work, we can deliver prototyping/UI kits, pattern libraries, or design systems, giving you the tools to build on our UI designs in the future while saving time and money. We are also extremely familiar in building designs with the GOV.UK, Digital Scotland, GOV.WALES, and NHS design systems and prototyping kits to ensure coherency and consistency across public services.

Key benefits of our service:

- Brand assets become more accessible and easier to work with
- Design systems aligned to your brand guidelines, enabling scalability
- Service Standard and GOV.UK and NHS design system compliance
- Consistent and predictable UI improves usability and user journeys
- Seamless experience from mobile to laptop/desktop, including touch/voice/AI input
- Go beyond WCAG 2.2 accessibility compliance with inclusive design
- Measurably deliver a better user experience, save money/time, and optimise conversions
- A highly-experienced creative team with a proven track record
- Data/security in-line with Cyber Essentials Plus and ISO 27001

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
----------------------	---

Full details and pricing can be found within CACI's published Lot 3 - Cloud Support Rate Card Rate Card which shows the range and cost of expertise.
