CACI CMS DISCOVERY AND IMPLEMENTATION SERVICES

CACI is a technology delivery partner combining UCD, UX, Accessibility and digital strategy with evidence-based CMS recommendations.

We deliver, support, maintain AEM, Drupal, Wordpress, and headless/composable platforms like Sanity, Contentful, Contentstack, Prismic and many others.

We integrate headless solution using Javascript frameworks such as React, Vue.js, Angular, Next.js, Nuxt, combined with custom API integrations and 24/7 support, aligned to the GOV.UK-Service-Standard.

We run a discovery phase to audit your workflows, understand editors' expectations, and align the IT requirements with your marketing and product strategy. Our user-centric, consultative approach provides qualitative/quantitative evidence-based CMS / DXP recommendations and digital strategy in-line with GDS Assessment Methods and the Technology Code of Practice.

Once your new CMS / DXP is selected, we can design and build all the features, components, cloud infrastructure and third-party integrations to deliver a robust, scalable, and secure Content Management System that can power all your multi-channel digital campaigns.

Key benefits of our service:

- Increased confidence in new CMS / DXP selection, reducing risks
- Deliver tailored experiences based on user behaviour and preferences
- Reduce content debt, streamline analytics reporting, and improve SEO
- Streamline the management of multiple websites for your content editors
- Enable data-driven decisions and continually improve campaign effectiveness
- Integrate with ERP or CRM back-office applications and external services
- Reduce technical debt and total cost of ownership
- Collaborative approach to knowledge sharing and upskilling your team
- Springboard to support/develop digital and content strategy
- Data/security in-line with Cyber Essentials Plus and ISO 27001

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.

Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's published Lot 3 - Cloud Support Rate Card Rate Card which shows the range and cost of expertise.
