EDGE CLOUD SERVICES

Consultancy and development of Edge Cloud infrastructure and data processing systems, including novel and next generation technology investigation and testing. Assessing application of Edge technology in the context of C4ISR / C5ISR / A2ISR and Data processing more broadly. Features of the service include:

- Development and investigation into Edge cloud capability
- Delivery of Edge cloud environment test bed development and experimentation
- Context of data processing in denied/limited environments to enable Intelligence, Surveillance and Reconnaissance (ISR) capabilities
- Investigations into emerging technologies such as fully homomorphic encryption

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the the published Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's the published Lot 3 - Cloud Support Rate Card which shows the range and cost of expertise.
