

## PRICING DOCUMENT

### SECURE CLOUD CONSULTANCY

CACI provide customers with experience-based consultancy on design, implementation, migration and running of secure cloud services. Our expertise enables customers to move services and workloads to the cloud with confidence. We advise on the best way to leverage cloud technology to reduce running costs whilst minimising security and compliance risk.

- Secure-by-design implementation patterns for wide range of cloud services
- Designed for UK-OFFICIAL (SENSITIVE) in-line with NCSC and CIS principles
- Architectural best practices in line with Well-Architected Framework
- Certified Solutions Architects, Cloud Engineers and Developers
- Track record delivering secure, high performance, mission-critical systems for HMG
- Secure-by-design provides greater resilience and reduced security and compliance risk
- Reach back into partner networks for specialist expertise.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

| Model                    | Detail                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Time and Materials (T&M) | T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.                                                                                                                                                                                                                |
| Fixed Price (FP)         | Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card. |
| Managed Service (MS)     | Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.                                                                                                                                                                                                    |

Full details and pricing can be found within CACI's published Lot 3 - Cloud Support Rate Card which shows the range and cost of expertise.
