AWS LANDING ZONE ACCELERATOR - TRUSTED SECURE ENCLAVES

As the first UK partner to achieve AWS Trusted Secure Enclaves (TSE) Vetted Partner (VP) status, CACI brings unparalleled experience and expertise to the development and deployment of secure cloud solutions. With a proven track record of success in mission-critical sectors, including Global National Security, Government and defence, CACI is uniquely positioned to help your organisation navigate the complexities of secure cloud adoption

Jezero-TSE is built on the proven Jezero platform, this specialised offering combines a decade of expertise in Landing Zone Accelerator (LZA) and Trusted Secure Enclaves (TSE) to cater to the unique needs of organisations who operate in Mission-Critical, Highly-regulated, Global National Security, Government, and Defence sectors.

CACI's certified experts collaborate with you to understand your unique needs, devise a comprehensive migration plan, that utilises Jezero-TSE's advanced technology for a seamless, secure cloud transition, meeting the highest standards Government and National Standards, validated by an AWS Foundation Technical Review (FTR)

We have successfully:

- Expertly delivered the award-winning Home Office EBSA platform, managing 400K+ containers daily for three departments and over 50 development teams.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using our Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's Lot 3 - Cloud Support Rate Card.
