CLOUD MATURITY ASSESSMENT FOR AWS OR AZURE

Our cloud maturity assessment is a checkup for your organisation's cloud journey. It helps you understand how to get the most out of the cloud. We use a Cloud Maturity Model (CMM) framework (AWS or Azure) to advise on stages of cloud adoption, from ad-hoc use to fully integrated cloud strategies. We use AWS Well Architected Framework to advise on stages of cloud adoption, from ad-hoc use to fully integrated cloud strategies. We also use Azure Well Architected Framework to advise on stages of cloud adoption, from ad-hoc use to fully integrated cloud strategies. Features of this service include:

- Undertaken by certified AWS or Azure Consultants as appropriate
- Measures Operational Excellence/Security/Reliability/Performance
- Efficiency/Cost Optimisation
- Strategy: Determine how well-defined is your cloud adoption plan
- Alignment: How your strategy aligns to business objectives
- People: Determine how skilled your staff are and capability gaps
- Processes: Review your processes to manage the cloud effectively
- Security: Clarify your attitude to security risk and identify vulnerabilities
- Governance: Determine if your cloud resources are compliant with policy/regulation
- Cost Management: Optimise your cloud spending
- Business Case Support: High-level business case justifying improvement funding.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
----------------------	---

Full details and pricing can be found within CACI's the published Lot 3 - Cloud Support Rate Card which shows the range and cost of expertise.
