CYDONIA CLOUD PLATFORM AND OPERATIONAL SUPPORT FOR BIOMETRICS

Cydonia delivers a next generation biometric face matching solution optimised for the cloud. Cydonia is built on CACI's 'Jezero' Secure Cloud Platform and is powered by Cydonia delivers a next generation biometric face matching solution optimised for the cloud.

Cydonia is integrated onto CACI's 'Jezero' Secure Cloud Platform and is powered by Paravision Search. This dynamic fusion guarantees not only flawless integration and support, but also scalability, security and a multitude of advanced AI features, propelling Cydonia to the zenith of biometric excellence.

We are a biometric agnostic supplier meaning other biometric algorithms can also be integrated into Cydonia if they are engineered to be cloud native and operate on Kubernetes.

Cydonia can be installed and supported on customers AWS owned accounts or dedicated AWS accounts securely managed by CACI as a managed service.

Licensing for Cydonia is licensed on a per transaction and use case model (e.g. 1:1, 1:n etc).

The cloud native (Kubernetes) architecture enables us to leverage the full power of AWS auto-scaling, both up and down, resulting in significant cost savings over the life of the service compared to traditional fixed compute models.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the Lot 3 - Cloud Support.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's Lot 3 - Cloud Support Rate Card which shows the range and cost of expertise.
