SERVERLESS DESIGN, DEVELOPMENT AND MIGRATION SERVICE

Serverless architectures provide task-driven, cost effective cloud solutions enabling customers to benefit from highly scalable services and low running costs. CACI provide a serverless development and migration service to re-design your applications to run in a serverless environment. We provide in depth technical knowledge with a hands-on approach obtained through extensive use of the Serverless Framework. Features of the service include:

- Experts on best-practice using AWS Lambda, API Gateway, ECS, Fargate
- Design, Development and support for serverless containers using AWS Fargate
- Reduced attack surface through serverless architectures
- Microservices and serverless architecture expertise
- Designed for UK-OFFICIAL (SENSITIVE) in-line with NCSC and CIS principles
- Certified Solutions Architects, Cloud Engineers and Developers
- Architectural best practices in line with the AWS Well-Architected Framework
- Cleared engineers including Security Check (SC) and Developed Vetting (DV).

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's published Lot 3 - Cloud Support Rate Card which shows the range and cost of expertise.
