SECURITY ARCHITECTURE AND CYBER SECURITY SERVICES

Our Security Architecture and Cyber Security Services build on our team's experience in delivery enterprise scale Critical National Infrastructure for the United Kingdom. With ever expanding threat landscape and increase in volume and sophistication of attacks ensuring systems are secure and can be delivered at pace with the required level of confidence and assurance required is a growing challenge.

Our services, based on Security Architecture standards and secure DevSecOps principles, address the end-to-end security requirements to securely develop or migrate workloads and services to cloud while automating compliance and assurance functions (compliance as code) of cloud workloads.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the Lot 3 - Cloud Support Rate Card.

Full details and pricing can be found within CACI's Lot 3 - Cloud Support Rate Card which shows the range and cost of expertise.
