CLOUD AND VIRTUALISATION ARCHITECTURE, MIGRATION AND OPTIMISATION SERVICE

CACI provides a full range of cloud solutions and services, including provider assessment, adoption strategy, landing zone architecture, migration planning, cost optimisation, set up, best practices, readiness and operations. CACI uses a proven adoption and architecture frameworks, considering all technical and business aspects, risk analysis and mitigation. CACI's service provides the following benefits to customers:

- Effective architecture to optimise: providers, costs, resilience, performance, security
- Comprehensive approach examining application portfolio using standard adoption frameworks
- Links cost optimisation remediation tasks to beneficial impacts
- Builds the evidence needed to support any remediation tasks
- Assists with cloud network security compliance certification and accreditation
- Moves applications between cloud providers and supports multi-cloud
- Enables automation including Infrastructure as Code (IaC)
- Infrastructure as code (IaC) and containerised development enables portability
- Upskilling of customer teams through open and collaborative approach
- High-availability through assessments and capacity planning

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the published Lot 3 - Cloud Support Rate Card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the published Lot 3 - Cloud Support Rate Card.
