1 Service Overview

Sogeti's (part of Capgemini) Generative AI accelerator, Amplifier is an in house Generative Artificial Intelligence or Gen-AI ready platform designed to enhance the capabilities of product owners, architects, and quality engineers. From the inception of requirements and infrastructure design to software testing, our platform paves a smooth, efficient path to execution.

Sogeti's Gen-AI for Quality Engineering & Testing is specifically designed to augment the team's skills and tasks. It doesn't just make the process faster and more efficient, it evolves at a human-like speed. With our Gen-AI Amplifier, you can boost test coverage, help to detect critical bugs early in the development cycle, and reduce the manual effort required for testing.

As your Quality Engineering and independent testing partner, Sogeti is committed to delivering quality business outcomes at speed and an optimum cost. Partner with us to experience an elevated level of efficiency, effectiveness, and success in your projects.

2 Business Need

Mid to large organisations are progressively seeking to leverage Gen-AI for efficiency and innovation. The market is seeing a general increased adoption of AI in testing, where it is becoming a key enabler for test case generation, automation script generation, defect analysis, data generation and predictive analysis.

The business demand for Gen-AI in testing is centred around enhancing the effectiveness, efficiency, and dependability of the testing process, ultimately leading to better software quality and business outcomes.

Sogeti's Gen-AI can help with:

- **Efficiency:** Gen-AI can automate various facets of testing, including test case generation, execution, and result analysis. This automation can significantly reduce the time and effort required for testing, thereby increasing the efficiency of the testing process.
- **Accuracy:** Automated testing with Gen-AI can help improve the accuracy of testing by reducing the chances of human error. AI algorithms can identify patterns and anomalies more effectively than manual testers, leading to more reliable test results.
- **Scalability:** As software applications become more complex and the need for continuous integration and delivery grows the scalability of testing becomes crucial. Gen-AI can scale testing efforts by quickly generating and executing test cases across different environments and configurations.
- **Cost Reduction:** By automating testing processes, Gen-AI can help reduce the overall cost of testing. While there might be an initial investment in setting up AI-powered testing frameworks, the long-term savings in terms of time and resources can be significant.
- **Risk Mitigation:** Thorough testing is essential for identifying and mitigating risks associated with software defects and vulnerabilities. Gen-AI can help enhance risk mitigation by providing comprehensive test coverage and identifying potential issues early in the development cycle.

3 Our Approach

Our Generative AI accelerator enables us to deploy either an on-premise tool instance into your data centre or utilise one of our cloud instances. The design facilitates the integration of expert domain knowledge from our global test experts with our staff and collaborative testers.

This tool is a mutual partnership between Sogeti and you. It serves as an entry point to broader applications of Generative AI tooling within an organisation to enhance service quality and foster innovative, risk-reduced working methods.

Our Generative AI accelerator allows us to

- It simplifies the application of an AI system into clear, uncomplicated steps centred on the Software Development Lifecycle.
- When you collaborate with us for testing, we bring the most recent version of our GenAI platform to ensure that you benefit from the best combination of human and artificial intelligence for successful delivery.
- Beneath the user-friendly interface, we have incorporated our industry standard TMAP approach and methods.
- It can convert meeting transcripts into the first draft of a requirement document for review.
- Its objective is to minimise the sluggish, time-consuming aspects of tasks, like requirement creation, allowing humans to concentrate on more intriguing and challenging areas.
- It allows testers to do more, by focusing on the novel aspects and challenges of the systems they are testing.
- Convert natural language requirements into strategies, plans, use cases and synthetic test data using industry recognised design techniques to create test case templates optimising test execution for functional and non-functional testing within a cloud based agile DevOps CI/CD environment.

4 Buyer Responsibilities

Please refer to the Supplier Terms listed with this service on the Platform. These may contain additional Buyer obligations/costs the Buyer is subject to that are not identified anywhere else in the Supplier's Application or on the Platform.

If these responsibilities do not match your expectations, then please contact us in order that we can explore options to vary our approach.

5 Service Management

Buyer-focused approach to delivery of information technology focuses on providing value to the Buyer and on the Buyer's relationship.

If Buyer has migrated to cloud but needs a capability to control of its newly modernised applications, things can get complicated very fast. Sogeti's managed Service Solutions are designed to solve that challenge.

Sogeti, which is part of the Capgemini Group, is one of 16 partners worldwide to be accredited as a Microsoft Azure Managed Services Provider (MSP) and its services help streamline operations with use of industrialised tools for effective Service Management and Service Delivery.

6 Protection of Data

This service is based on a security classification of 'Official', however should you have a requirement for a different security classification that you would like us to consider, please contact us to discuss.

7 On-boarding and Off-boarding

Capgemini shall undertake on-boarding and off-boarding activities agreed within the Order Form (including as a minimum an exit plan in line with the Call-Off Contract terms) which will be charged for in accordance with the Pricing section for this service.

8 Skills and Knowledge Transfer

Capgemini recognises that skills and knowledge transfer is a critical element in the provision of G-Cloud services to public sector clients. Where possible and applicable, this forms part of the delivery plan for the service agreed at the start of the engagement. Our consultants and engineers are experienced in providing skills and knowledge transfer for major private and public sector clients.

Where appropriate, we may use a standard approach, tailored to topic, skills-gap and individual, to ensure consistency and effectiveness. The approach, Capgemini's Assess-Plan-Implement framework, has been used repeatedly by our teams to structure the work involved in transferring skills and creating new teams capable of driving and sustaining change long after the end of the formal programme. The framework can be applied throughout a project to understand knowledge transfer objectives, plan training delivery methods and materials, and deliver and evaluate success.

9 Vendor Accreditations/Awards

Sogeti – the part of the Capgemini Group, is an award-winning company both globally and nationally. The below list presents companies' names that Sogeti has won series of awards with over the years:

2025 winners of Best Advancing Software Testing Practice, awarded to the team or initiative that has made a positive contribution to the software testing profession. This is in recognition of those that go above and beyond to make the testing industry or practice better. It means breaking down barriers, thinking beyond our employers or clients, and using our skills and knowledge for the betterment of the profession.

Microsoft, IBM, Intel areas of Testing, HPE, Oracle, Digital, High Tech related awards, ESRI S-GROUP, Delivery, awards related to technologies and solutions.

For the 13th year in a row, Capgemini has been recognized as one of the World's Most Ethical Companies® by the Ethisphere® Institute. This is an acknowledgment of our ethical culture that makes us an employer of choice and responsible player in the eyes of our clients, shareholders, and the wider community.

10 Sub-contractors

Capgemini UK may use the following subcontractors to deliver this service:

- Capgemini Technology Services India Limited.

11 Business Continuity and Disaster Recovery

No disaster recovery plan is provided as part of these Services.

12 Pricing

This service is priced in accordance with the SFIA Rate Card attached. Capgemini can also provide offshore resources at reduced rates where appropriate. Projects can be priced either on a Time & Materials or Fixed Price basis.

13 Ordering and Invoicing

Please refer to the Supplier Terms for this service.

We would be pleased to arrange a call or meeting to discuss your requirements of our service in more detail.

14 Termination Terms

Please refer to the Supplier Terms for this service.

15 Further Information

For more information about this or any of our G-Cloud services, please contact our Public Sector Team.

Phone: 0370 904 4858

Email: publicsector.opps.uk@capgemini.com including the following information:

1. The name of this service.
2. The name of your organisation.
3. Your name and contact details.
4. A brief description of your business situation.
5. Your preferred timescales for starting the work.

About Capgemini

Capgemini is a global business and technology transformation partner, helping organizations to accelerate their dual transition to a digital and sustainable world, while creating tangible impact for enterprises and society. It is a responsible and diverse group of 340,000 team members in more than 50 countries. With its strong over 55-year heritage, Capgemini is trusted by its clients to unlock the value of technology to address the entire breadth of their business needs. It delivers end-to-end services and solutions leveraging strengths from strategy and design to engineering, all fueled by its market leading capabilities in AI, generative AI, cloud and data, combined with its deep industry expertise and partner ecosystem. The Group reported 2024 global revenues of €22.1 billion.
