1 Service Overview

Capgemini's Application Management (AM) for Oracle in the Cloud service provides Application Management of cloud-hosted Oracle applications and Oracle Cloud Services. The service can encompass management of full stacks: virtual guest operating system (e.g. Linux, Windows), Oracle Database, Oracle Middleware, Oracle applications hosted on either PaaS (Platform-as-a-Service) or IaaS (Infrastructure-as-a Service) cloud platforms. The service also offers application management of PaaS applications and integrations with Oracle applications (Software-as-a-Service (SaaS)) along with user managed application configurations as required.

More and more organisations are migrating to modern versions of Oracle's Software-as-a-Service (SaaS) applications.. Some organisations may choose to maintain and retain their existing software investment by transferring legacy applications to cloud hosted Platform-as-a-service (PaaS) or Infrastructure as-a-service (IaaS) environments to maintain control and retain business functionality whilst taking advantage of the reduced infrastructure costs and reduced overheads that cloud hosting can bring.

Capgemini has built a flexible support model that uses its experienced Oracle specialists, partnerships with cloud providers and Oracle to provide a comprehensive Application Management offering to enable Buyers to achieve their business outcomes whatever platform and application landscape their Oracle software investment is hosted upon.

Capgemini's Application Management (AM) for Oracle in the Cloud service offers three Cloud support models – Gold, Silver and Bronze – which act as a wrapper to the Buyer's cloud Oracle applications services to manage the ongoing technical relationship with their cloud provider and/or Oracle to bring about the following benefits:

- A single experienced source for application management requirements
- The expertise to manage business critical services
- The expertise to leverage Oracle investments
- The expertise to manage software and cloud infrastructure
- The ability to extend support to related interfaces and a wider application estate
- Flexible service levels

Capgemini's Gold, Silver and Bronze support options are described below. The Buyer can choose to use any of these models. Alternatively, Capgemini will be happy to work with the Buyer collaboratively to identify and agree exactly the right support model as required which may be a combination of any of the models below. This will involve a period of consultation with the Buyer to draw up a matrix showing clearly where the responsibility and accountability sits for every element of the service.

This diagram is for illustration only and does not represent any obligation or responsibility of Capgemini.

2 Business Need

Capgemini delivers Application Management services that help the Buyer create more value for their business by improving efficiency of IT systems management and reduction of costs. Capgemini's services are highly industrialised, underpinned by robust SLAs or business driven outcomes, based on industry-standard proven

practices and can be delivered by a cost-effective mix of resources. Capgemini's Application Management services are about more than 'keeping the lights on for less' – they can represent a commitment to continuous improvement and value generation.

3 Our Approach

Capgemini's Application Management capability has been developed through more than 40 years of experience providing quality services to clients around the world and across all business sectors. The service builds on Capgemini's core skills in the management of application landscapes for their clients, based on long term experience in this area. Capgemini currently delivers such services to Central and Local Government departments, Police Constabularies, large retail organisation and global corporations using a highly experienced pool of service delivery specialists and Oracle technical specialists. Capgemini's Oracle capability is extensive and covers expertise in specific applications e.g. Financials, enhancement and integration, reporting, database, middleware and operating system.

Capgemini is experienced over many years in delivering these services within a "shared service" model involving multiple discrete organisations using the same core software components. Capgemini's various applications management services have been independently recognised by industry analysts such as Forrester and Gartner.

Regardless of whether this is an existing or new solution, Capgemini can work with the Buyer and any other relevant organisations to build a "Service Transition" plan so that the Capgemini teams providing the Application Management service understand every aspect of the business and technical requirements of the solution. This work can enable Capgemini to identify any efficiencies that can be built into the service to provide as streamlined a support service as possible whilst minimising costs.

Once in the "run" phase, Capgemini's Application Management approach is designed to take the full lifecycle view of applications aligned to the business cycle and can help work with their clients to extract maximum business benefit value from their Oracle software investment. In this way, Application Management can support the needs of the business to provide tangible business benefits and value add over the life of the contract

Capgemini has industrialised its service delivery globally to take advantage of low-cost economies to provide clients with a resilient and scalable applications support network that can grow and adapt as client business changes using a distributed delivery methodology known as "Rightshore®". Capgemini can offer an efficient and flexible support model which can cater for the specific requirements of the Buyer. This can take the form of different support models from a dedicated onsite team to a "mutualised" team based in one of Capgemini's delivery centres. Capgemini can work with the Buyer to identify the right model.

The service can offer the following benefits to Buyers:

- **Facilitating Cost Savings:** Capgemini has developed the concept of the IMSC (Industrialised Managed Service Centre) to provide a series of methodologies to help optimise support provision. Capgemini applies the principles and practice of LEAN, Capgemini works to 'Shift Left' all incident resolution and perform Root Cause Analysis to drive out defects.
- **Access** to a global organisation of Oracle experts.
- **Flexibility** in resourcing, from fractional FTEs to quick ramp-up and ramp-down;
- **Continuous Improvement in service quality** through Lean Foundations helps deliver process efficiency and continuous service performance improvements.
- **Assurance** of a pool of UK based security cleared resources with the broad range of experience required to manage all aspects of Oracle software hosted on cloud solutions.
- **Maximises** the use of proven tool sets and processes, fully aligned to the ITIL framework, to industrialise support and enhancement work – thus ensuring consistent quality and efficiencies.

4 Buyer Responsibilities

Please refer to the Supplier Terms listed with this service on the Platform. These may contain additional Buyer obligations/costs the Buyer is subject to that are not identified anywhere else in the Supplier's Application or on the Platform.

5 Service Management

This service will be managed by a UK service delivery manager who will be responsible for meeting agreed service performance targets.

6 Protection of Data

This service is based on a security classification of 'Official', however should the Buyer have a requirement for a different security classification, please contact Capgemini to discuss.

7 On-boarding and Off-boarding

Prior to the execution of the Order, the Supplier and the Buyer will agree the scope of the exit plan for the Services and a timescale for delivering an exit plan to ensure continuity of service.

Capgemini shall undertake on-boarding and off-boarding activities agreed within the Order Form and an exit plan in line with the Call-Off Contract terms which will be charged for in accordance with the Pricing section for this service.

8 Skills and Knowledge Transfer

Capgemini recognises that skills and knowledge transfer is a critical element in the provision of G-Cloud services to public sector clients. Where possible and applicable, this forms part of the delivery plan for the service agreed at the start of the engagement. Our consultants and engineers are experienced in providing skills and knowledge transfer for major private and public sector clients.

Where appropriate, we may use a standard approach, tailored to topic, skills-gap and individual, to ensure consistency and effectiveness. The approach, Capgemini's Assess-Plan-Implement framework, has been used repeatedly by our teams to structure the work involved in transferring skills and creating new teams capable of driving and sustaining change long after the end of the formal programme. The framework can be applied throughout a project to understand knowledge transfer objectives, plan training delivery methods and materials, and deliver and evaluate success.

9 Vendor Accreditations/Awards

For the 13th year in a row, Capgemini has been recognised as one of the World's Most Ethical Companies® by the Ethisphere® Institute. This is an acknowledgement of our ethical culture that makes us an employer of choice and responsible player in the eyes of our clients, shareholders, and the wider community.

Capgemini maintains strong strategic alliances with leading technology providers to deliver innovative Application Development and Maintenance (ADM) solutions in the cloud. Through its extensive “Cloud Alliance,” Capgemini partners with industry leaders such as Microsoft, Oracle, AWS, Salesforce, SAP, Google Cloud, VMware, MuleSoft, and others to enable end-to-end digital transformation for clients. These partnerships empower Capgemini to leverage cutting edge technologies across cloud, AI, and automation. Capgemini has consistently been recognised with numerous awards and accreditations from its partners and industry analysts, including multiple Google Cloud Partner of the Year awards for Generative AI, Sustainability, and Industry Solutions. These accolades underscore Capgemini’s commitment to delivering innovative, secure, and scalable solutions that drive measurable business outcomes for clients worldwide.

9.1 Analyst Recognition

9.2 Oracle

As a key global strategic partner, Capgemini continues to participate in the Sell, Service, and License & Hardware tracks, and holds recognized Expertise across Oracle’s SaaS, PaaS, and IaaS portfolio. Capgemini brings deep capabilities in Intelligent Cloud Operations, ERP Cloud Advisory, and industry-specific solutions, supported by over 11,400 Oracle-certified consultants worldwide and more than 85 OPN Expertise areas.

The power of our collaboration with Oracle continues to earn global recognition, with recent highlights including:

- **2025:** Capgemini named Regional Best-in-Class Service Partner for Technology/Cloud – EMEA at the Oracle Partner Awards, reflecting excellence in Oracle Cloud implementations and business impact across Europe, Middle East, and Africa.
- **2024 -2025:** Recognized as an Innovator in Avasant’s Oracle Cloud ERP Services RadarView™, for embedding generative AI in delivery platforms and accelerating ERP transformations.
- **2025:** Winner of multiple Oracle Partner accolades for cloud transformation projects and industry solutions, reinforcing our leadership in Oracle SaaS and PaaS deployments.

10 Sub-contractors

Capgemini UK may use the following subcontractors to deliver this service:

- Capgemini Technology Services India Limited.

11 Business Continuity and Disaster Recovery

Business Continuity requirements and Disaster Recovery management services can be added as options to the service if required. Capgemini would be pleased to discuss the specific requirements for these services in more detail to see how it can accommodate the needs of the Buyer.

12 Pricing

This service is priced in accordance with the SFIA Rate Card attached. Capgemini can also provide offshore resources at reduced rates where appropriate. Projects can be priced either on a Time & Materials or Fixed Price basis.

13 Ordering and Invoicing

Please refer to the Supplier Terms for this service.

Capgemini would be pleased to arrange a call or meeting to discuss the Buyer's requirements of the service in more detail.

14 Termination Terms

Please refer to the Supplier Terms for this service.
