1 Service Overview

Capgemini can support Public Sector organisations that wish to implement and embed Agile ways of working across their business and IT function. We can reduce risk by helping the transition to new ways of working either in situations where the change is still being planned or where the journey to Agile may have started, but barriers are preventing successful transformation. Our Agile Transformation service can help manage the transition to Agile by providing experienced Capgemini practitioners supported by tried and tested methods.

We can use past experience, industry standards and your own expertise and nuances to define new ways of working, processes, and roles; all whilst establishing appropriate governance. To underpin the change, we help to build and embed the culture and environment required for a successful transformation.

2 Business Need

Public Sector organisations undertaking transformation initiatives, including Cloud Services, often require support in implementing and embedding Agile ways of working. This can include Government Digital Services standards as well as industry agile approaches such as SAFe (Scaled Agile Framework), DAD (Disciplined Agile Delivery) and Nexus (which is a framework for scaling the Scrum approach).

Capgemini has the capability to deploy a cross skilled team of Agile experts who can work with transformation leads to implement the journey to Agile and increase the likelihood of success.

3 Our Approach

We work collaboratively alongside our customers to support transformation initiatives. Often, Public Sector organisations tasked with digital transformation, including cloud services initiatives, are seeking to maximise the benefits found when implementing Agile ways of working. These changes may result from technological, market, organisational and regulatory changes and are likely to follow the direction set by Government Digital Services.

Capgemini can support clients in implementing Agile in many ways, including:

- identifying drivers for change and understanding measures of success
- analysing current level of agility of people, processes, and technology
- understanding and helping to overcome barriers to success.
- stakeholder management, including identification, planning and effective tools.
- creating an Agile operating model
- planning and defining projects and programmes to implement the change.
- defining new ways of working, including processes, roles, governance, and organisation
- selecting appropriate methodologies and tools
- providing agile coaching, learning, knowledge transfer for capability development
- building and embedding culture change
- resource augmentation
- implementing environments required to underpin the success of the transformation.
- measuring and monitoring performance and the delivery of benefits.

4 Buyer Responsibilities

Please refer to the Supplier Terms listed with this service on the Platform. These may contain additional Buyer obligations/costs the Buyer is subject to that are not identified anywhere else in the Supplier's Application or on the Platform.

5 Service Management

This service can be delivered as a defined project or on a day rate basis.

6 Protection of Data

This service is based on a security classification of 'Official,' however should you have a requirement for a different security classification that you would like us to consider, please contact us to discuss.

7 On-boarding and Off-boarding

Prior to the execution of the Order, the Supplier and the Buyer will agree the scope of the exit plan for the Services and a timescale for delivering an exit plan to ensure continuity of service.

Capgemini shall undertake on-boarding and off-boarding activities agreed within the Order Form and an exit plan in line with the Call-Off Contract terms which will be charged for in accordance with the Pricing section for this service.

8 Skills and Knowledge Transfer

Capgemini recognises that skills and knowledge transfer is a critical element in the provision of G-Cloud services to public sector clients. Where possible and applicable, this forms part of the delivery plan for the service agreed at the start of the engagement. Our consultants and engineers are experienced in providing skills and knowledge transfer for major private and public sector clients.

Where appropriate, we may use a standard approach, tailored to topic, skills-gap and individual, to ensure consistency and effectiveness. The approach, Capgemini's Assess-Plan-Implement framework, has been used repeatedly by our teams to structure the work involved in transferring skills and creating new teams capable of driving and sustaining change long after the end of the formal programme. The framework can be applied throughout a project to understand knowledge transfer objectives, plan training delivery methods and materials, and deliver and evaluate success.

9 Partnerships/Alliances

This section is intentionally left blank.
