1. Product Overview

Colt's SD-WAN is a managed service that enables enterprise customers to improve the performance and manageability of their network by enabling network traffic paths to be easily defined and managed on a per application basis and by providing useful analytics and network status information.

Colt SD-WAN with hybrid connectivity is a complete WAN solution to support secure, scalable networks across a full range of connectivity types. We offer co-managed and managed service options to help you:

- **Gain Agility:** Adapt quickly to changing business needs via our self-service portal. Benefit from faster site provisioning and support digital business and cloud initiatives with additional services like Colt Adaptive Network Control.
- **Increase Availability:** Leverage flexible WAN design options to fit individual site needs including high-availability configurations.
- **Improve Cost Efficiencies:** Seamlessly integrate multiple hybrid connectivity options and flexibly use them across your ecosystem. In addition to reducing administrative overhead with a single invoice, you'll benefit from price predictability with fixed operational expenses.
- **Boost Application Performance:** Align routing with application and business requirements to deliver proven customer experiences with a high-performance network — ideal for the growing number of cloud applications driving business.
- **Decrease Business Risk:** Leverage our expertise to reduce the implementation and security risks associated with transforming your network and adopting new technologies.

Technical Features/Capabilities

- Broad range of connectivity options including MPLS/IP VPN, broadband aggregation, dedicated internet, 4G/LTE and/or bring-your-own transport
- Flexible WAN design options to fit individual site needs including high-availability configurations
- Service wrapper that includes design, deployment, service configuration, site activation, change management, appliance/circuit monitoring and event management, appliance upgrades and 24/7 support for the entire WAN solution
- SD-WAN-hosted infrastructure, software licenses and multiple rental customer premise equipment (CPE) options supporting up to 10 Gbps
- 24/7 customer self-service portal access for agile co-management
- Authentication, key exchange and encryption
- Application identification with automatic identification of over 3,100 pre-defined and customer defined applications for policy-based application control
- Historical analytics, reporting and near real-time tools
- Integrated firewall with optional next generation firewall functionality including URL filtering, IP filtering and IDS/IPS.

2. Pricing Tables

2.1. Pricing Overview

SD-WAN Package (24/36 months)	Max Bandwidth (bps)	Standard Deployment MRC*	High Availability Deployment MRC*
