Compute Infrastructure (PaaS / IaaS) & Server Support

Pricing Methodology

Core's Compute Infrastructure managed service solution delivers a comprehensive support capability for both your on-premise and cloud-based server infrastructure. Subscription to Core's managed services provides you with infrastructure monitoring, incident reporting and raising service requests for changes with our Service Desk. To compliment the Compute Infrastructure managed service, our Server Roles managed service will take care of your infrastructure at the application level. Our desire to be transparent and easy to work with is reflected in our simple pricing plans.

Units	5 - 10	10 - 20	20-50	50+	100+
Azure IaaS device	£57.18	£54.69	£52.20	£49.72	£45.20
Server roles	£110.66	£105.85	£101.04	£96.23	£87.48

Important Notes

- Pricing per month per unit unless otherwise specified.
- Please review the Prerequisites, Environments, Inclusions and Exclusions in our Service Description document.
- All pricing is net of VAT at the prevailing rate.
