Contensis for Councils

Contensis for Councils goes beyond simply providing a Digital Experience Platform, (DXP) and Content Management System (CMS). It offers a combined off-the-shelf modern and functional website and DXP/CMS solution that includes a number of pre-built templates, content models, and components.

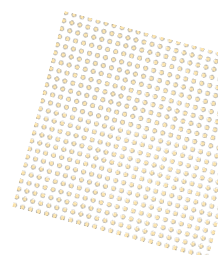

It is backed up by our optional professional services and delivered as a hosted, software-as-a-service (SaaS) solution.

You'll need to consider these elements as part of your environment:

- The Contensis for Councils licence type you require
- Any additional extensions and upgrades you require (optional)
- Any additional resilience or environments (optional)
- Use of our professional services (optional)

Most customers opt to use our professional services to maximise the solution's potential. While we offer quotes that are fully tailored to your requirements, we've outlined some typical implementation packages below that are available at a discount.

Full details of our professional services are also available under Lot 3 on G-Cloud. We can help with seamless data migration and any bespoke development, customisation, user experience, information architecture, or integrations you need.

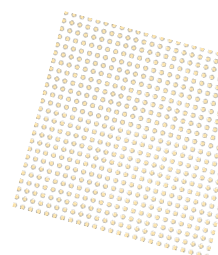

Licence types

Your base licence covers the core Contensis for Councils functionality, hosting, support and updates. The different pricing and licence types relate to the scale of your project. Move up tiers as your organisation grows in traffic, storage, and the number of projects.

	Starter	Plus	Enterprise
Bandwidth per month	200GB	400GB	1TB
Storage	50GB	100GB	200GB
Concurrent users	5	10	Unlimited
