Power Bi Starter for 10

Power Bi Starter for 10

HITACHI

What the service is, what you get, and the benefits

Service Description

Get insight from your data in as little as 10 days. We run requirements workshops, analyse data from multiple sources, prototype dashboards, then develop data models and Power BI reports. Includes solution design, environment and data access setup, UAT, user training and deployment, plus stakeholder playback and scope sign-off.

Service Features

- Requirements workshops to agree business questions and priorities
- Data analysis to assess sources, quality, and reporting feasibility
- Rapid dashboard prototypes with stakeholder playback and refinements
- High-level solution design and scope sign-off in week one
- Systems and data access setup for agreed source systems
- Environment and infrastructure readiness to support Power BI delivery
- Data development to load, shape, and prepare datasets
- Data modelling to build analytical models for dashboards
- Dashboard development to build interactive reports answering real questions
- UAT, user training, and deployment of the finished dashboards

Service Benefits

- Get insight in as little as 10 days
- Answer real business questions with interactive Power BI dashboards
- Combine data from multiple sources into one view
- Improve decision making with clear, consistent measures and models
- Build confidence through stakeholder playback and visible progress
- Keep reporting secure with data privacy built in
- Reduce rework by agreeing scope and solution design early
- Enable users to take action from trusted data insights
- Provide production-ready proof of value before wider rollout
- Grow into a broader reporting and analytics platform over time

Power Bi Starter for 10

HITACHI

Get a governed Power BI reporting foundation in days, not months

What this service is for

Turn real business questions into trusted dashboards

This service helps teams that need clear answers from data, quickly, without creating a reporting mess. We run short workshops to agree the business questions, KPIs and definitions, then build a usable Power BI reporting foundation with a semantic model and measures that people can rely on.

We design and validate dashboards with users, then publish safely using deployment pipelines and agreed permissions. The focus is production-ready proof of value, delivered on a short timebox (typically as little as 10 days).

Key outcomes: Agreed KPIs and definitions | Reusable semantic model | Accessible dashboards | Controlled publishing | Clear handover

Why this service is useful

Remove rework and rebuild confidence in the numbers

Teams often lose time arguing about definitions, rebuilding the same measures, and working around spreadsheets because there is no shared model or controlled way to publish changes. This creates delays, duplicated effort, and dashboards that look good but cannot be maintained.

This service creates a repeatable pattern for measures, modelling, security and release, so reporting becomes quicker to change and easier to govern. You get insight you can act on, plus a foundation you can extend.

Common triggers: KPI disagreement | Spreadsheet-heavy reporting | Slow dashboard delivery | Low trust in numbers | New data sources to combine | Accessibility expectations

Why this service is different

Timeboxed delivery with governance built in

We start with the decisions your teams need to make, then build the minimum reporting foundation required to answer those questions properly. That means clear KPI definitions, a reusable semantic model, and user validation before anything is treated as “done”.

We publish through controlled deployment, apply permissions and row-level security, and capture the essentials for assurance and support. The result is not just a dashboard, but a governed pattern that is maintainable and ready to extend.

Differentiators: Decision-led KPI definition | Semantic model first | Accessibility considered early | Controlled releases | Audit-friendly documentation

Power BI Starter for 10

Power BI is the world's leading data analytics platform and our Power BI Starter for 10 package allows you to get answers to real business challenges in as **little as 10 days**.

We help our customers load and **model their data** to build compelling **interactive dashboards** that will give you the insight to make **informed business decisions**.

Our consultants will work with you to ensure that the dashboard unlocks the **value in your data** and provides you with production ready proof that data analytics using **Power BI provides real return on your investment**.

Value from your data: Power BI Starter for 10

HITACHI

Benefits

Fast time to value –
insight in as little as 10
days

Interactive dashboards that
answer real business
questions

Data from multiple
sources

Secure with data
privacy built in

Enabling train of
thought analysis

Enabling you to take
action from your data
insights

“Data in... Value out

Power BI Starter for 10: How it Works

HITACHI

Business Requirements

We make sure to understand the business problem you're looking to solve and work with you to craft a solution that will deliver tangible outcomes

Rapid Prototyping

We'll give you early sight of your data in Power BI, keeping us focused, on track and allowing you to make tweaks to the dashboard as we build it

Playback

We walk through the insights we have discovered in your data with key stakeholders, leaving you with a refreshable Power BI dashboard and a plan for future development.

Data Analysis

We profile and audit your data to build up a picture of how we can answer the questions and what an analytical data model will look like

Development

We build the data ingestion routines, transformation jobs and visualisations to bring your data to life. Security and privacy rules are also developed to keep your data secure

Our Plan: Business Value From Power BI in 10 days

A typical Power BI Starter for 10 engagement, focusing on aligning data analytics with real world business challenges

The Hitachi logo is displayed in a bold, white, sans-serif font in the upper right corner of the image. The background is a photograph of a grand, multi-story classical building with a curved facade, many windows, and a balcony with a decorative railing. A large Union Jack flag is flying from a pole on the right side of the building. The overall image has a muted, greyish tint.

Our Services and Expertise

HITACHI

Sustainable business transformation through tailored advisory, consulting, and technology solutions.

Our Clients

"Hitachi Solutions brings substantial digital expertise to the table, complementing our robust business experience. Their insights have been instrumental in identifying opportunities for enhancement and accelerating our initiatives."

Gillian Pratt
Deputy Director Future Regulation
at Environment Agency

"Hitachi Solutions brought in a great project team who we kept for the full duration; they engaged with The Royal Mint side of things very effectively. It really felt like they were part of our own team."

Richard Hobbs
CIO The Royal Mint

"Hitachi Solutions bring the innovation, space and expertise needed to deliver digital transformation at a pace that is needed."

Andy MacDonald
Director of Customer Services,
Aberdeen City Council

"Hitachi Solutions were really good to work with, expertly turning our processes into slick system functionality. Their patience, understanding and "one team" approach to this project facilitated a free-flowing, inclusive environment. Hitachi Solutions' expert technical teams have delivered a great user experience, employing creative thinking to deliver to our often complex requirements."

Daniel Saward
OIA Head of Digital Technology

"DHSC collaborates closely with Hitachi Solutions LTS, emphasising the significance of our enduring partnership characterised by collaborative teamwork and mutual trust. Operating with a framework of high trust and capability, Hitachi Solutions ensures the delivery of quality and excellence to DHSC. Hitachi Solutions should be very proud of their track record in DHSC."

Bryan Rayner
Head of IT Business Systems

"Right from the start, we recognised in Hitachi Solutions a potential partner that would listen to us and really recognise the value of what we were trying to achieve, the lifesaving benefits of what we were trying to build and support."

Alex Duncan
Chief Technology Officer
