Volume Discounts

IBM has a strategic Memorandum of Understanding (MoU) with Crown Commercial Services (CCS) which is applicable to all Public Sector Customers buying via G-Cloud.

This provides agreed baseline levels of discounts and details higher levels of discounts for larger volumes or greater durations of contract. The IBM pages describing this are at https://ibm.biz/ccs_mou. Public Sector clients can request a full copy of the IBM MOU from CCS by sending an email to info@crowncommercial.gov.uk. The pricing in this G-Cloud Offering takes account of the MOU baseline discounts. As IBM's portfolio is somewhat complex and there are several factors that affect the pricing; if your requirements are for more than just one license for a month, we would suggest that you contact us directly to ask us to provide you with pricing with the correct levels of discount for the term and volumes that you require.

The email address for G-Cloud related enquiries is ukcat@uk.ibm.com. Please ensure that you indicate which G-Cloud Offering(s) you are requesting details for.

Unit based Pricing

Note: Minimum Users 5 & Minimum 12 months

1.0 Pricing Models

- 1 - VPC-hours offer flexibility for SaaS workloads that can support on-demand scaling
- 2 - Flow-based, a consumption-based model where users pay upfront for some multiple of 100k flow runs
 - Simple, non-tiered pricing – just apply the number of quantities needed
 - Usage averaged over 12-month period such that seasonal, peak usage is accounted
 - Purchase fixed term annual contracts for 1, 2, 3 years
 - Service suspended if usage exceeds 105% of entitlement –must buy more to resume service

Additional details:

- 1 VPC is 1 vCPU and 2GB Memory
- VPC is sum of CPU limit set across all deployed runtimes
- CPU usage will be sampled several times hourly.

Flow-based pricing

Consumption-based model where users pay upfront for some multiple of 100k flow runs. Every time you execute an integration you are executing a flow which will count against your 100k entitlement.

- A “Flow” is an integration artifact that includes one or more steps (nodes) that may automate movement of data between a source and target.
- A “Flow Run” occurs when an event triggers a Flow to execute any one or more nodes in the flow.

Education Pricing

Available subject to sizing

Unit Based Pricing

Part Code	Part Description	QTY	12 Month Total	Per QTY Per Month
D0CXVZX	IBM App Connect Enterprise as a Service 3 Asset per Annum	1	£ 1,012.20	£ 84.35
