- Work with your stakeholders to obtain support and gain buy-in
- Communicate the programme objectives and benefits
- Assist with development of a compelling business case
- Agree programme phases, dependencies and deliver a High Level Design
- Estimate and address the organisational change impact
- Assessment of suitability for both Cloud and mobile device deployment
- Manage Detailed Design adopting IBM accelerators and AI agents
- Configure the Cloud applications, integrate where required and test the resulting solution
- Train the business and IT teams
- Manage the cutover and post production support

Benefits

- Surety of Success: By working with the most experienced Oracle partner in the market
- Meet business expectations for technology investment and supply chain transformation
- Adopt standard SaaS functionality, with regular innovations as part of the product
- Predictable run costs, elastic costs based on usage
- Reduce the total cost of IT ownership
- Add value: Take advantage of adjunct cloud-based technology such as Machine Learning, Artificial Intelligence and Robotic Process Automation
- Re-design or enhance business processes to reduce complexity
- Move to a proven, scalable architecture
- Get there quickly – IBM have delivered Oracle Cloud applications in as little as 9 weeks

Key Differentiators

- IBM Agentic AI assistants, robotics and automations pre built for over 70 use cases in the Oracle Cloud to accelerate ROI
- Centres of Excellence for development of focused Oracle Industry solutions
- We have operational live clients in Oracle Government Cloud as well as Commercial Cloud across the whole suite of solutions

Addressing Business Needs

We work in partnership with you to address your business needs, leveraging our deep industry and technical expertise, tools, and approach to deliver Digital ready solutions for a range of business needs.

Example Questions asked when considering Oracle Cloud solutions

- What is the business case for moving to Oracle Cloud?
- How much can be saved by moving to the cloud?
- Can Oracle SaaS address my business needs?
- What features in cloud can I exploit? time to market

Example Questions when migrating from On- premise to Cloud

- What is the migration approach to cloud?
- Can I be on cloud and on premise?
- Will I lose functionality?
- Do I still need my customizations?

Example Business Needs where Cloud ERP and HCM play a key building block

- The need to take-out structural costs for competitiveness and to fund investment in growth
- Winning the war for talent to access intelligence and innovation
- Transform enterprise processes and systems to enable growth and competitiveness

IBM Supporting Government

We help government organisations in the UK and worldwide deliver and transform essential public services – our teams are passionate and proud about helping you to make a real difference to people's lives.

The problems we solve for clients are complex and cannot be satisfied with technology alone. They require a partner that can also offer deep industry expertise and a relationship of trust.

IBM combines the portfolio, people and sense of purpose necessary to meet today's enterprise demands. Every day, we support and manage complex delivery for government clients where the impact of delivery has wide-reaching impact on citizens and national services.

We bring access to the industry experience, insight and technology capability to deliver and operate secure, scalable, optimised and available services for government.

We support you by bringing:

- Industry expertise – Professionals who understand and are passionate about delivering quality public services and can bring industry insights and apply innovation to your business processes
- Trust and security capabilities – Protecting valuable data and insights and deploying new innovations responsibly
- Innovative technology – Expertise in areas such as AI, blockchain, 5G, Automation, IoT, cybersecurity and quantum, delivered in a Hybrid Cloud environment
- Experienced Services professionals to support strategy, innovation and deliver transformation and change to processes, applications, and cloud infrastructure
- Global alliances – valuable partnerships with the world's leading vendors

Delivery Principles

The principles of how we think and act in our delivery to clients include:

- Building long-term client relationships based on innovation, trust and service excellence
- Using Design Thinking and Agile approaches to help frame and execute our client's change programs
- Infusing cognition and emerging technologies into our clients' enterprises and core processes
- Exploiting hybrid multi-cloud-based solutions to underpin evolving client processes
- Developing and deploying world-class talent
- Using consistent, modern methods and tools, constantly reviewing and refining to accelerate the value we deliver
- The ability to thrive and succeed in engagements driven by globally dispersed, multi-disciplined teams using our suite of collaboration tools is at our core
- Maintaining the highest standards of Social Value and delivery ethics
