IBM DB2 Warehouse as a Service

IBM Db2® Warehouse unifies data across hybrid clouds, enabling fast, governed access for analytics and AI. It integrates with Db2, data lakes, and watsonx.data™, runs on low-cost cloud object storage, and delivers 4x faster performance with caching.

Pricing is based on usage, with rough estimates provided below based on our template configurations. Each of these configurations is highly scalable, with potential discounts available based on the volume of resource requested.

	Flex One	Flex	Flex Performance
Description	Starter A starter data warehouse designed for new data warehouse projects and growing enterprises, with the ability to independently scale compute and storage.	Storage Optimized An MPP data warehouse ideal for cost - effective data warehousing, dev/test environment, infrequently accessed data	Compute Optimized An MPP data warehouse idea for high - performance and production workloads
Architecture	Single Node	Massively Parallel Processing	Massively Parallel Processing

Annual Cost (\$)	\$20,487.89	\$99,653.76	\$185,887.20

IBM has a strategic MoU with Crown Commercial Services (CCS) which is applicable to all Public Sector Customers buying via G-Cloud. This provides agreed baseline levels of discounts and details higher levels of discounts for larger volumes or greater durations of contract.

The IBM pages describing this are at https://ibm.biz/ccs_mou.

Public Sector clients can request a full copy of the IBM MOU from CCS by sending an email to info@crownccommercial.gov.uk

The pricing in this G-Cloud Offering takes account of the MOU baseline discounts. As IBM's portfolio is somewhat complex and there are several factors that affect the pricing; if your requirements are for more than just one license for a month, we would suggest that you contact us directly to ask us to provide you with pricing with the correct levels of discount for the term and volumes that you require.

The email address for G-Cloud related enquiries is ukcat@uk.ibm.com. Please ensure that you indicate which G-Cloud offering(s) you are requesting details for.
