

Accelerated Data Flow & Intelligence Integration

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Accelerated Data Flow & Intelligence Integration

Service Description

A service for organisations seeking robust, dynamic data movement and integration solutions that enable intelligent, agile, and connected data ecosystems across complex environments.

Features

- End-to-end consultation on dynamic data movement architecture
- Integration with legacy and modern enterprise applications
- Automated real-time and scheduled data migration workflows
- Advanced data transformation and cleansing capabilities
- Support for cloud, hybrid, and on-premises environments
- Comprehensive monitoring and performance analytics dashboard
- Intelligent routing for optimized data delivery and processing
- Robust governance and compliance policy implementation
- Custom connector development for hard-to-integrate systems
- Seamless scaling for future data volume and usage growth

Benefits

- Accelerates time-to-value for enterprise data initiatives
- Reduces manual integration effort through automation
- Enables real-time insights by unifying varied data streams
- Enhances decision-making via intelligent data aggregation
- Future-proofs infrastructure for digital transformation
- Mitigates data silos, fostering a connected information landscape
- Supports regulatory compliance and data quality mandates
- Improves operational efficiency and reduces IT overhead
- Facilitates faster adaptation to business change or expansion
- Empowers organizations to unlock advanced analytics potential

Constraints

Requires access to source and target systems; customization may extend delivery timelines.
