

AI Model Lifecycle Management

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

AI Model Lifecycle Management

Service Description

AI Model Lifecycle Management is perfect to streamline, automate, and scale AI model development and operations using robust MLOps and Foundation Model Ops software.

Features

- Comprehensive AI model lifecycle management from development to deployment
- Automated workflows for data preparation, training, and validation
- Continuous integration and delivery for AI/ML models
- Advanced monitoring and performance analytics for models in production
- Integrated governance, compliance, and audit-ready reporting
- Support for foundation models and large language models at scale
- Robust version control for data, code, and model artifacts
- Collaborative platform for cross-functional AI teams
- Seamless integration with popular cloud and on-prem AI platforms
- Customizable automation pipelines tailored to unique enterprise requirements

Benefits

- Accelerates time-to-value for AI initiatives across the enterprise
- Reduces operational risk through rigorous governance and compliance
- Enhances model accuracy and reliability with continuous performance monitoring
- Streamlines collaboration between data science, IT, and business teams
- Scales AI deployment seamlessly across hybrid and multicloud environments
- Improves productivity by automating manual MLOps processes
- Simplifies adoption of cutting-edge foundation and large language models
- Ensures full traceability and auditability of all AI assets
- Optimizes resource utilization through intelligent orchestration
- Delivers measurable business impact through consistent AI operations

Constraints

Requires access to enterprise data sources and cloud or on-prem infrastructure.
