

Intelligent Software Change & Configuration Lifecycle Management

G Cloud 15 - LOT1A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Software Change & Configuration Lifecycle Management

Service Description

A premium consulting service for enterprises seeking to optimize, automate, and govern software change, configuration, and development processes across PaaS environments.

Features

- End-to-end assessment of existing software lifecycle processes
- Automated change management workflows and policy enforcement
- Advanced configuration tracking and version control implementation
- Integration of process management tools with CI/CD pipelines
- Comprehensive risk analysis and impact assessment for changes
- Custom KPI dashboards for lifecycle and quality metrics monitoring
- Stakeholder training in change, release, and configuration best practices
- Seamless integration with cloud-native PaaS platforms and services
- Continuous process improvement recommendations and roadmapping
- Documentation templates and frameworks for ongoing governance

Benefits

- Reduces deployment risks and improves development reliability
- Accelerates software release cycles with automated controls
- Ensures compliance with internal and industry quality standards
- Improves auditability and traceability of all software changes
- Enhances collaboration between Dev, Ops, and business teams
- Minimizes downtime and service interruptions during updates
- Drives adoption of modern DevOps and agile methodologies
- Enables proactive identification of process bottlenecks
- Supports scalability of change management as the business grows
- Strengthens overall governance and future-proofing of IT environments

Constraints

Requires client participation in workshops; client must provide process access and stakeholder availability.
