

Solution Brief

Insight Veeam Deployment Service

Background and business challenge

With workloads accelerating to multi-cloud ecosystems and workers increasingly operating remotely, data is harder to manage and control than ever before. As a result, organisations need reliable security and ransomware protection that fends off increasing risk of cyberthreats now and into the future, giving them business resiliency, no matter what size they are.

We can help by deploying a Veeam solution.

Why Veeam?

- Veeam provides a single platform for modernising Backup, accelerating hybrid cloud and securing your data.
- The platform is open and compliments a broad ecosystem of partners to integrate into any client environment easily.
- Veeam is software-defined and hardware agnostic, providing the ultimate in best-in-class solutions and client flexibility.
- Veeam provides a simple, flexible and reliable Backup so our customers can go beyond and focus on their business

Our solution

Insight's Veeam Deployment service is a pre-scoped deployment module for designing and installing a Veeam Data Protection Solution.

Clients may have limited resources or skills to design and deploy Veeam Solutions, and the Veeam Deployment service provides this capability. Additionally, as a Certified Veeam Partner, Insight can provide comprehensive Veeam data protection solution deployment utilising our certified consultants and engineers.

We provide a pre-scoped, fixed-cost service inclusive of all resources to simplify the complexity and approach for Insight clients.

What you can expect

We provide:

- Certified Veeam Specialists.
- National UK Coverage, including SC cleared engineers.
- A complete package including design, deployment and project management to a predefined scope.
- The scope is to Vendor Best Practice Standards and approach.
- Quick, simple, no risk, fixed cost – Fast time to deployment.
- Knowledge transfer to the customer with detailed documentation as-built report.

Business outcomes

Organisations that run on the Veeam Platform are more efficient and much quicker to respond to business needs and deliver new digital services.

Simple

Granular recovery, analytics, scalable architecture.

Flexible

Software-defined, hardware agnostic, cloud-ready.

Reliable

100% tested, portable data format, "it just works."

Why Insight?

We help our clients modernise and secure critical platforms to transform IT. We believe data is a crucial driver, hybrid models are accelerators, and secure networks are well integrated. Our end-to-end services empower companies to effectively leverage technology solutions to overcome challenges, support growth and innovation, reduce risk, and transform the business.
