

Enterprise Storage Replication Assurance

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Enterprise Storage Replication Assurance

Service Description

Comprehensive consulting for organizations seeking resilient, high-availability storage through best-in-class replication software and expert data protection strategies.

Features

- End-to-end assessment of current storage replication architecture
- Design and deployment of enterprise-class replication software solutions
- Customised replication policy and schedule optimization
- Automated failover and disaster recovery configuration
- Continuous data protection for mission-critical workloads
- Integration with hybrid, on-premises, or multi-vendor storage environments
- Performance tuning to minimize replication lag and optimize bandwidth
- Compliance-driven data protection and retention strategies
- Centralized monitoring and proactive alerting setup
- Comprehensive documentation and administrator training

Benefits

- Ensure near-zero data loss during disruptions or outages
- Maintain business continuity with robust disaster recovery processes
- Reduce recovery time objectives and meet strict SLAs
- Safeguard compliance with industry-specific data regulations
- Seamlessly support hybrid and heterogeneous storage platforms
- Enable real-time replication and rapid failover capabilities
- Gain detailed visibility and actionable analytics on replication health
- Minimize operational risk with expert-guided implementation
- Optimize infrastructure investments and resource utilization
- Empower IT teams with knowledge transfer and best practices

Constraints

Requires supported storage platforms, network bandwidth, and customer stakeholder engagement.
