

Accelerated Application Build Blocks for PaaS

G Cloud 15 - LOT1A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Accelerated Application Build Blocks for PaaS

Service Description

Comprehensive consulting and integration of reusable software components on PaaS, empowering enterprises to streamline, scale, and modernize application development.

Features

- Accelerated deployment of reusable software construction components
- Expert integration with leading PaaS platforms for application agility
- Modular design for rapid customization and scalability
- End-to-end consulting on component selection and architecture
- Secure development practices embedded into the component pipeline
- Continuous integration and delivery support for faster releases
- Performance optimization for cloud-native software assemblies
- Automated testing and validation of software building blocks
- Comprehensive documentation and developer enablement resources
- Alignment with enterprise compliance, governance, and quality standards

Benefits

- Significantly reduced development time for new applications
- Lower maintenance and operational costs through component reuse
- Rapid scaling and modernization of enterprise digital services
- Enhanced code quality and security across application estates
- Increased agility to respond to changing business requirements
- Faster time-to-market with pre-validated software components
- Empowered development teams with robust and standardized tools
- Seamless integration with existing and future PaaS investments
- Improved governance and traceability of application components
- Future-proofed architecture to support ongoing digital innovation

Constraints

Requires compatible PaaS environment and buy-in from development stakeholders.
