

Database Replication Strategy & Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Database Replication Strategy & Enablement

Service Description

A service delivering resilient, scalable database replication architectures for medium to large organisations seeking robust data management, business continuity, and global scalability.

Features

- Comprehensive assessment of current database infrastructure and business needs
- Design of customised replication topologies for optimal performance
- Support for hybrid and multi-cloud database environments
- Implementation of real-time and scheduled data replication solutions
- Seamless integration with leading relational and NoSQL platforms
- Disaster recovery planning and high-availability configuration
- Automated monitoring, alerting and reporting dashboards
- Optimisation of bandwidth and network utilisation for replication traffic
- End-to-end security and encryption for replicated data streams
- Training and documentation for operational teams and stakeholders

Benefits

- Mitigates risk of data loss through continuous real-time replication
- Accelerates business continuity with automated failover options
- Supports global operations with geo-redundant database deployments
- Improves data accessibility for distributed teams and applications
- Enables seamless scaling of mission-critical workloads
- Reduces manual intervention through automation and best practices
- Enhances compliance posture for regulated data environments
- Optimises IT investment by leveraging existing database assets
- Boosts stakeholder confidence in operational resilience
- Empowers IT teams with best-in-class knowledge transfer and support

Constraints

Requires access to source and target databases; pre-existing licensing and network prerequisites may apply.
