

# **IoT-Driven Event Stream Orchestration Consulting**

**G Cloud 15 - LOT2A**

# 1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

## 2. Insight for the Public Sector

### Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

### Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

## **Our Approach: Consulting, Lifecycle, & Managed Services**

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

## 3. Services

### Service Name

IoT-Driven Event Stream Orchestration Consulting

### Service Description

Comprehensive consulting service for enterprises seeking to integrate, orchestrate, and deploy real-time IoT application platforms, enabling data-driven decision making and operational agility.

### Features

- Assessment of existing IoT and integration landscape
- Design of robust event stream architectures
- Implementation of scalable orchestration workflows
- Integration of heterogeneous IoT devices and sensors
- Development of real-time data ingestion pipelines
- Deployment of secure and compliant IoT application platforms
- Customisable event processing rules and automation
- Dashboards and analytics for event monitoring
- Enablement of cloud-native and hybrid deployment models
- Knowledge transfer and operational training for client teams

### Benefits

- Accelerates digital transformation with intelligent IoT integration
- Delivers real-time data insights for faster decision-making
- Streamlines complex event processing and workflow automation
- Supports seamless scaling as business needs evolve
- Reduces operational siloes between OT and IT systems
- Enhances security and compliance across IoT applications
- Improves resource utilisation and reduces downtime
- Empowers business users with actionable analytics
- Lowers total cost of ownership via efficient orchestration
- Future-proofs enterprise through adaptable, modular platforms

## Constraints

Requires client access to IoT data sources and stakeholder engagement throughout project.
