

RapidDB: Enterprise Low-Code Database Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

RapidDB: Enterprise Low-Code Database Enablement

Service Description

Accelerate secure, scalable database solutions for businesses seeking fast, user-driven application development with minimal coding, fully supported by expert consulting and governance.

Features

- Custom low-code database platform design tailored to business needs
- Integration with existing enterprise applications and workflows
- Robust data governance and compliance framework implementation
- Automated deployment for rapid solution rollouts
- Role-based access controls for enhanced data security
- Built-in analytics and dashboarding capabilities for key metrics
- Seamless migration of legacy databases with minimal disruption
- Continuous monitoring and optimisation for database performance
- End-user enablement and low-code training workshops
- Ongoing managed support and best-practice updates

Benefits

- Accelerate application delivery cycles and reduce time-to-value
- Empower business users to build solutions without heavy IT reliance
- Reduce operational costs via automation and simplified interfaces
- Ensure data security and compliance from day one
- Mitigate risk with expert-led governance and best practices
- Boost productivity through streamlined database management
- Facilitate agile business responses to evolving data needs
- Unlock innovation by democratising database application creation
- Minimise business disruption with guided migration and integration
- Drive continuous improvement with proactive managed services

Constraints

Requires compatible enterprise IT infrastructure; custom integrations may extend timelines.
