

Intelligent Document Database Enablement

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Intelligent Document Database Enablement

Service Description

Empower enterprises with scalable, document-oriented database solutions to streamline unstructured data management, optimize development agility, and deliver high-performing applications.

Features

- Architect and deploy modern document-oriented database platforms
- Assess existing data landscape and application readiness
- Design highly scalable, schema-flexible data stores
- Implement robust data security and role-based access controls
- Migrate legacy structured/unstructured data to new platforms
- Enable seamless data integration with APIs and microservices
- Automate performance tuning and query optimization
- Deliver comprehensive monitoring and health dashboards
- Provide developer enablement and agile best practices training
- Establish data lifecycle, archival, and compliance frameworks

Benefits

- Accelerate application development for complex data models
- Easily scale to handle dynamic and voluminous data growth
- Increase development agility with flexible schema design
- Enhance data-driven decision making across business units
- Reduce operational complexity of unstructured data storage
- Strengthen data protection and regulatory compliance posture
- Enable rapid integration with cloud-native platforms and tools
- Minimize downtime and improve database performance metrics
- Empower internal teams through expert knowledge transfer
- Support future innovation with a robust, future-ready foundation

Constraints

Requires compatible infrastructure; not suited for highly relational, ACID-dependent workloads.
