

AI-Powered Application Build and Deployment Accelerator

G Cloud 15 - LOT2B

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

AI-Powered Application Build and Deployment Accelerator

Service Description

End-to-end consultancy for enterprises seeking to design, build, and deploy robust AI-driven applications using advanced AI platforms and lifecycle automation.

Features

- Comprehensive AI application design and architecture consultation
- Rapid prototyping and proof-of-concept development
- Integration of AI lifecycle management tools and practices
- Custom AI model development tailored to business needs
- Automated deployment pipelines for efficient release management
- Best practice governance for AI build and deployment processes
- Rigorous testing and validation of AI applications
- Enterprise-grade security protocols integrated throughout the lifecycle
- Continuous monitoring and performance optimization of deployed AI solutions
- Documentation, user enablement, and transition to internal teams

Benefits

- Accelerates time-to-value for AI-enabled business solutions
- Reduces operational risk through proven best practices
- Ensures alignment with enterprise architecture and standards
- Enhances scalability and flexibility of application deployments
- Boosts productivity via automation and lifecycle tooling
- Improves solution quality with rigorous testing and validation
- Ensures robust security and compliance from design to deployment
- Supports organizational change with knowledge transfer
- Allows focus on innovation rather than infrastructure
- Maximizes ROI through continuous optimization and performance insights

Constraints

Requires stakeholder buy-in, existing cloud or hybrid infrastructure, and access to relevant data sources.
