

Resilient Storage Replication Consulting for Enterprise Arrays

G Cloud 15 - LOT2A

1. Insight

Insight leads the delivery of transformative solutions, supported by a powerful ecosystem of over 6,000 global partners including Microsoft, AWS, and Cisco.

As a Fortune 500 company with a long-standing history of delivering trusted services to the UK Public Sector, we combine our own deep expertise in consulting, advisory, and transformation with partner innovation to create holistic solutions across cloud, data, modern workplace, cybersecurity, and application services.

Guided by proven methodologies and ESG principles, we work collaboratively to design and implement tailored strategies that drive measurable business impact while promoting sustainability and governance excellence.

2. Insight for the Public Sector

Your End-to-End Digital Transformation Partner

As a leading Solutions Integrator, Insight combines deep technical expertise with a vast partner ecosystem to help UK government organisations modernise, innovate, and deliver citizen-centric services. We hold places on over 85 public sector frameworks, offering a compliant, efficient route to digital transformation.

We don't just supply IT; we design, deploy, and manage the solutions that secure your data and unlock value.

Core Areas of Expertise

- **Innovation, Data & AI:** we deliver end-to-end data science and custom AI solutions. From modernising data platforms to deploying bespoke machine learning and spatial computing, we help you unlock the value of your data to drive operational efficiency.
- **Modern Infrastructure & Cloud:** Building scalable, hybrid foundations that reduce technical debt and support multi-cloud strategies.
- **Modern Workplace:** Empowering the public sector with secure, flexible tools to work from anywhere, attracting talent and improving productivity.
- **Cybersecurity:** Comprehensive managed security services, threat detection, identity protection, and compliance management to ensure your data remains sovereign and secure.
- **Modern Apps:** Agile application development creating meaningful and impactful tools that link to tangible benefits, improvements and cost savings.

Our Approach: Consulting, Lifecycle, & Managed Services

We deliver value at every stage of your technology journey, ensuring accountability from strategy to support:

- **Consulting (Architecting the Future):** We bridge internal skills gaps with data-driven strategy. From "Discover & Design" to full-scale migration planning, we ensure your investments solve real public sector challenges.
- **Lifecycle (Seamless Execution):** We take the risk out of procurement and deployment. Leveraging global buying power, we handle everything from supply chain management and imaging and implementation to sustainable asset disposal (ITAD).
- **Managed Services (Always-On Support):** Shift from "keeping the lights on" to innovation. We provide 24/7 infrastructure monitoring, cloud cost optimisation (FinOps), and security operations to ensure resilience.

3. Services

Service Name

Resilient Storage Replication Consulting for Enterprise Arrays

Service Description

Expert consulting for organizations seeking robust, array-based data replication and protection strategies to ensure uninterrupted business operations and data integrity.

Features

- Comprehensive assessment of current storage replication capabilities
- Design and implementation of array-based replication strategies
- Integration with leading enterprise storage platforms and hardware
- Policy-driven data protection and failover planning
- Configuration of synchronous and asynchronous replication options
- Automated monitoring and alerting for replication health
- Customizable recovery point and recovery time objectives
- Workshops and training for IT teams on replication best practices
- Documentation of replication topology and operational procedures
- Ongoing optimization and scalability recommendations

Benefits

- Minimizes risk of data loss during outages or disasters
- Ensures high availability for critical business applications
- Accelerates recovery times through proven methodologies
- Improves compliance with industry data protection standards
- Reduces IT team workload with automation and best practices
- Facilitates seamless data mobility across enterprise environments
- Enhances operational resilience and business continuity posture
- Provides expert guidance on optimal platform and licensing choices
- Future-proofs storage infrastructure for evolving business needs
- Delivers measurable return on investment in data protection

Constraints

Requires compatible enterprise storage arrays and network; scope excludes non-array replication.
